David P. Lohman
Director of Public Utilities

October 25, 2012

To whom it may concern,

As Director of Public Utilities for the City of Meriden, I have observed Richards Corporation perform water main and service line installation on various construction projects in Meriden. I have received nothing but positive feedback from the property owners and staff concerning their quality of work and performance.

I would recommend Richards Corporation to perform all water related installation, maintenance and repairs for your company.

If you have any questions concerning this matter please contact this office.

Sincerely,

David P. Lohman
Director of Public Utilities
